Trans. of [Hua Hsien Hsien Pao] (Chinese People's Republic) 1957, v. 23, p. 30-38.

DESCRIPTOR: *Lithium compounds, Carbon, *Carbides, Eutectics, Phase studies.

A study of the lithium-carbon system was made in terms of thermal analysis. The preparation of melt and the recording of cooling curves were done in argon atmosphere. The structural phase diagram of the system for the stage between lithium and lithium carbide (Li_2C_2) was determined. Lithium and lithium carbide form a eutectic whose composition lies nearly to pure lithium (carbon content was less than 1 atomic %); the eutectic point was about 165°C . By means of the boiling point (Chemistry-Physical, TT, v. 9, no. 9) (over)
